Subject:	Transitioning Youth Into The Division Of Mental Retardation Services (DMRS) Adult Services
Authority:	TCA- 33-9-102, 37-5-106
Standards:	DCS 5-401, 6-300-302, 7-100A-101A
Application:	All Department of Children's Services Employees
Policy Statement:	
All youth in DCS custody with mental retardation nearing adulthood shall be referred for DMRS services prior to adult age.	
Purpose:	
To ensure DCS youth diagnosed with mental retardation obtain needed DMRS services prior to age mandated release from custody.	
Procedures:	
A. Supplemental Security Income Application at Age 16½	The DCS Family Service Worker (FSW) will make application for Supplemental Security Income (SSI) financial benefits at the age of 16½ years for a child with a handicapping condition. If it has been determined the youth is not already receiving SSI benefits, the FSW will telephone the Social Security Administration office to schedule a new referral appointment. During the initial interview with the Social Security representative, the FSW will be informed of the documentation needed to support the SSI application. SSI application approval generally takes from four to six months.
B. DMRS Waiting List	Once a child diagnosed with mental retardation enters custody, the FSW will telephone the Division of Mental Retardation Services (DMRS) to arrange an intake application appointment to place the youth on the Mental Retardation (MR) Medicaid Waiver waiting list. The intake appointment will include completion of an Inventory for Client and Agency Planning (ICAP) for determining payment category based on behavioral severity. Psychological testing with a full-scale intelligence score of 70 or below prior to adult age is required before a child can be added to the waiting list. Although children without Supplemental Security Income (SSI) can be put on the waiting list, they cannot be approved for MR Waiver Services without SSI benefits.
C. Conservator Appointment	When a youth with mental retardation turns age 17, the FSW will contact the DCS Regional liaison or point person to inquire about appointment of a conservator. DMRS legal staff handles the court process. The FSW is responsible for filling out the required forms and participating in the court hearing. Although a conservator appointment cannot be made before the youth reaches adult age, the appointment date can be timed to coincide with the

	<p>youth's adult birthday or transition to adulthood date. Failure to begin the conservator appointment process can impede adult transition into DMRS services since appointment of a conservator can take several months, dependent upon the local court. Be aware that some conservator requests will not be approved based on the youth's higher adaptive level of functioning. If a conservator is not appointed, DMRS cannot provide services unless the youth consents in writing to accept MR Waiver services.</p>
<p>D. Preliminary Referral to DMRS At age 17½</p>	<p>The FSW will contact DMRS to begin the DMRS application process when the youth is age 17½. This will allow DMRS to have preliminary discussions about the youth's treatment needs with DCS and potential providers to begin a general provider search. Additionally, a DMRS case manager will be assigned to the case until MR Waiver services are approved. The DMRS case manager should be invited to attend any adult transition planning Child and Family Team Meeting sessions.</p>
<p>E. 90 Days before the Youth is to Exit Custody</p>	<p>90 days before the youth's adult birthday or age mandated custodial release date; the FSW will telephone DMRS to request an intake appointment for completion of the Preadmission Application Evaluation (PAE). The PAE document functions as the youth's initial plan of care for DMRS. The PAE must be updated every 90 days during the application process. A current psychological evaluation (within 90 days) and a physical examination report must be included with the PAE. Additionally, DMRS will advise DCS if there is other supporting documentation needed.</p> <ol style="list-style-type: none"> 1. The FSW will schedule a physical examination with the Primary Care or other Physician if a physical examination by a licensed physician has not been completed in the past year. The annual medical screenings performed by the Health Department are unacceptable since these evaluations are not performed by a physician. Still, this physical exam will not replace the annual Early Periodic Screening Diagnosis and Treatment (EPSD&T) screening. Because the PAE requires a physician's signature, the physician conducting the physical exam may need to sign the PAE application at the same time the physical examination is being completed. DMRS will notify DCS if the PAE is ready for a signature then. 2. The FSW will schedule a psychological evaluation in coordination with the ATS and DMRS. Completion of a psychological evaluation for the sole purpose of the DMRS admission is not a TennCare covered service. TennCare does cover psychological evaluations determined to be medically necessary. Once a psychological evaluation is completed, like the PAE, it must be updated every 90 days while DMRS services are being finalized. If a psychological evaluation has been completed within the past 90 days, this report can be used for the DMRS admission process as long as updates can be obtained.
<p>F. Submission of the PAE to the Bureau of TennCare</p>	<p>When the PAE is completed with all necessary supporting documentation, DMRS will submit the PAE packet of information to the Bureau of TennCare for approval. The approval process takes approximately eight to ten days. During this period, TennCare may request additional documentation. If TennCare denies the PAE, resubmitting an amended PAE, with additional documentation,</p>

	may result in PAE approval. DMRS will alert DCS when they recommend PAE resubmission. Any denial of service will need to be appealed within 30 days from the denial letter date. Contact the Regional Well Being unit for assistance with filing the appeal.
G. Convene Adult Transition CFTMs	After TennCare approval of the PAE, the FSW will convene Child and Family Team meetings (CFTM's) as often as necessary to effect adult transition into DMRS services. When TennCare approves the PAE, DMRS will identify a service provider and a specialized case manager called an Independent Support Coordinator (ISC). The DMRS case manager, ISC, and prospective provider should be included in the Adult Transition CFTMs to plan for the youth's transition.
H. DMRS Transition Date	Once a date is set for the youth to transition into DMRS services, the FSW or ATS will notify DCS Child Placement staff to terminate DCS services on the transition date.
